

Publikationslisten 2002 for Frederiksborg Amts Sygehuse

Publikationslisten 2002 er udarbejdet af **FoQUS**.

Redaktion:

Lægefaglig forskningskonsulent Morten Breindahl

Kvalitetschef Anne Mette Fugleholm

Overassistent Susanne Christensen

Publikationslisten 2002 er udarbejdet på grundlag af afdelingernes tilbagemeldinger på en udsendt forespørgsel og efterfølgende to rykkere vedlagt en vejledning for såvel kategorisering som grafisk fremstilling. Afdelingerne har selv afgjort fordelingen på de udvalgte kategorier, hvorefter redaktionen har foretaget den endelige korrektion og tilpasning til kravene om, at kun følgende publikationer optages i listen:

- Afhandlinger (ph.d. og disputatser)
- Publikationer i videnskabelige tidsskrifter (*Peer-reviewed*)
- Videnskabelige meddelelser i form af abstracts eller postere
- Bidrag til lærebøger, bøger og publicerede rapporter

De enkelte kategorier er indholdsmæssigt specificeret i den udsendte vejledning.

Afdelingerne er anmodet om at udforme den enkelte publikationsangivelse som en litteraturhenvielse i overensstemmelse med Vancouvergruppen og som beskrevet i Ugeskrift for Lægers seneste manuskriptvejledning af januar 2002. Forkortelser og tidsskriftsnavne er angivet i overensstemmelse med det system, der anvendes i Indeks Medicus. Navn på den eller de medarbejdere ved den pågældende afdeling, som har bidraget til publikationen, er understreget.

FoQUS takker for indsatsen i forbindelse med fremskaffelse af oplysningerne til *Publikationslisten 2002*.

Forord

Af

Professor, overlæge, dr.med. Per Bech
Formand for Frederiksborg Amts Forskningsudvalg

Hermed foreligger *Publikationslisten 2002* i et samlet format for sygehusene i Frederiksborg Amt. Listen er udarbejdet på baggrund af afdelingernes input og efterfølgende redigeret af **FoQUS**. Indholdet i listen er strammet op i forhold til tidligere udgivelser, idet der nu kun er medtaget deciderede videnskabelige publikationer i form af afhandlinger, artikler, postere, abstracts eller bidrag til lærebøger og rapporter.

Sundhedsudvalget i Frederiksborg Amt har for nylig vedtaget en ny strategi for forskning på amtets sygehuse. Den overordnede hensigtserklæring er at skabe gode rammer og vilkår for forskningen, og herunder oprette en synlig rådgivningsstruktur samt uddannelses tilbud til forskere i amtet. På længere sigt er det målet at gøre amtets sygehuse til attraktive arbejdspladser for de specialister, der kan bidrage til at frembringe ny viden og nye behandlingsmetoder.

Forskningsindsatsen er en helt naturlig del af amtets øvrige indsatsområder inden for kvalitetsudvikling, kompetence og uddannelse. Dertil kommer, at opdyrkning og vedligeholdelse af seriøse og alsidige forskningsaktiviteter i betydelig grad medvirker til et dynamisk og spændende arbejdsmiljø, som vil kunne tiltrække fagpersoner og specialister.

Forskning er en vidt favnende proces, som kan udføres af vidt forskellige personalegrupper. Grundstenen i enhver forskningsaktivitet udspringer imidlertid af en personlig nysgerrighed, videbegærlighed og ønsket om at øge ens egen kompetence og færdigheder. Det er netop sådanne egenskaber, der har afgørende betydning for dynamikken i vores sundhedssystem. Dette potentiale skal fremmes og dyrkes, således at vi også fremover vil kunne møde de stigende krav og udfordringer, arbejdet med vore patienter indebærer.

Forskningsudvalget i Frederiksborg Amt ønsker at medvirke aktivt til, at denne forskningsaktivitet synliggøres mest muligt. *Publikationslisten 2002* dokumenterer, at der på sygehusene i Frederiksborg Amt er et imponerende incitament og engagement for at gå nye veje, afprøve innovative idéer og teste hypoteser, som ultimativt har til formål at bedre behandlingen af vore patienter. Indirekte dokumenterer listen tilmed, at også patienterne via deres aktive deltagelse i disse kliniske undersøgelser gerne bistår til udviklingen af nye metoder og behandlinger til gavn for nuværende og kommende generationer.

På Forskningsudvalgets vegne,

Per Bech
