

Publikationslisten 2004 for Frederiksborg Amts Sundhedsvæsen

Publikationslisten 2004 er udarbejdet af **FoQUS**.

Redaktion:

Overlæge, dr. med. Per Jess

Kvalitetschef, Overlæge, Ph.D. Anne Mette Fugleholm

Forskningsrådgiver, Ph.D. Maj-Britt Juhl Poulsen

Overassistent Susanne Andersen

Publikationslisten 2004 er udarbejdet på grundlag af anmelders tilbagemeldinger på en udsendt forespørgsel, vedlagt en vejledning for såvel kategorisering som grafisk fremstilling. Anmelder har selv afgjort fordelingen på de udvalgte kategorier, hvorefter redaktionen har foretaget den endelige korrektion og tilpasning til kravene om, at kun følgende publikationer optages i listen:

- Afhandlinger
- Artikler i videnskabelige tidsskrifter (*Peer-reviewed*)
- Videnskabelige meddelelser i form af abstrakts eller postere
- Bidrag til bøger, lærebøger og rapporter

Anmelder er anmodet om at udforme den enkelte publikationsangivelse som en litteraturhenvielse som beskrevet i Ugeskrift for Lægers seneste manuskriptvejledning af januar 2005, der tager udgangspunkt i Vancouvergruppens anbefalinger. Anmelder er desuden anmodet om at forkortelser og tidsskriftsnavne er angivet i overensstemmelse med det system, der anvendes i Index Medicus.

FoQUS takker for indsatsen i forbindelse med fremskaffelse af oplysningerne til *Publikationslisten 2004*.

Forord

Af

Professor, overlæge, dr.med. Per Bech

Formand for Sundhedsvæsenets Forskningsudvalg i Frederiksborg Amt

Hermed foreligger *Publikationslisten 2004* i et samlet format for sygehusene i Frederiksborg Amt. Listen er udarbejdet på baggrund af funktionsenhedernes input og er efterfølgende redigeret af FoQUS. Der er kun medtaget deciderede videnskabelige publikationer i form af afhandlinger, artikler, postere, abstracts eller bidrag til lærebøger og rapporter.

Forskningen i Frederiksborg Amt er funderet i 'Strategi for forskning i Frederiksborg Amts Sundhedsvæsen 2003-2006'. Visionen er, at forskning indgår som en integreret del af opgaverne for alle afdelingerne på amtets sygehuse. Dette opnås ved, at behandling, pleje og forskning populært sagt "går hånd i hånd" blandt andet ved etablering af forskningsenheder i de kliniske enheder.

Dette i erkendelse af, at forskningsbaseret viden er en forudsætning for, at borgernes sundhedsproblemer varetages på et rationelt grundlag, ligesom forskningen er fundamentet for kvalitetsudvikling og fremme af patientbehandlingen.

Udvikling og vedligeholdelse af seriøse og alsidige forskningsaktiviteter medvirker også til at skabe dynamiske og spændende arbejdsmiljøer, som vil kunne støtte rekrutteringen og fastholdelsen af gode og værdifulde medarbejdere.

At amtets forskningsstrategi har båret frugt, er *Publikationslisten 2004* dokumentation for. Det fremgår, at antallet af videnskabelige artikler i forhold til året før er øget med 34 %, ligesom også antallet af afhandlinger er steget. Vi står således også forskningsmæssigt godt rustet til den nye regionsdannelse.

På Forskningsudvalgets vegne,

Per Bech
