

Publikationslisten 2005 for Frederiksborg Amts Sundhedsvæsen

Publikationslisten 2005 er udarbejdet af **FoQUS**.

Redaktion:

Overlæge, dr. med. Per Jess

Kvalitetschef, Overlæge, Ph.D. Anne Mette Fugleholm

Forskningsrådgiver, Ph.D. Maj-Britt Juhl Poulsen

Overassistent Susanne Andersen

Publikationslisten 2005 er udarbejdet på grundlag af anmelders tilbagemeldinger på en udsendt forespørgsel, vedlagt en vejledning for såvel kategorisering som grafisk fremstilling. Anmelder har selv afgjort fordelingen på de udvalgte kategorier, hvorefter redaktionen har foretaget den endelige korrektion og tilpasning til kravene om, at kun følgende publikationer optages i listen:

- Afhandlinger
- Artikler i videnskabelige tidsskrifter (*Peer-reviewed*)
- Videnskabelige meddelelser i form af abstrakts eller postere
- Bidrag til bøger, lærebøger og rapporter

Anmelder er anmodet om at udforme den enkelte publikationsangivelse som en litteraturhenvisning i overensstemmelse med Vancouver-reglerne. Anmelder er desuden anmodet om at forkortelser og tidsskriftsnavne er angivet i overensstemmelse med det system, der anvendes i Index Medicus, og at navn på den eller de medarbejdere ved den pågældende enhed/afdeling, som har bidraget til publikationen, er understreget.

FoQUS takker for indsatsen i forbindelse med fremskaffelse af oplysningerne til *Publikationslisten 2005*.

Forord

Af

Overlæge, dr.med. Per Jess

Formand for Sundhedsvæsenets Forskningsudvalg i Frederiksborg Amt

Hermed foreligger *Publikationslisten 2005* i et samlet format for sygehusene i Frederiksborg Amt. Listen er udarbejdet på baggrund af funktionsenhedernes oplysninger og er efterfølgende redigeret af FoQUS. Der er kun medtaget deciderede videnskabelige publikationer i form af afhandlinger, artikler, postere, abstracts eller bidrag til lærebøger og rapporter.

Forskningen i Frederiksborg Amt er funderet i 'Strategi for forskning i Frederiksborg Amts Sundhedsvæsen 2003-2006'. Visionen er, at forskning indgår som en integreret del af opgaverne for alle afdelingerne på amtets sygehuse. Dette opnås ved, at behandling, pleje og forskning populært sagt "går hånd i hånd" blandt andet ved udpegning af forskningsansvarlige og etablering af forskningsenheder i de kliniske enheder. Dette i erkendelse af, at forskningsbaseret viden er en forudsætning for, at borgernes sundhedsproblemer varetages på et rationelt grundlag, ligesom forskningen er fundamentet for kvalitetsudvikling og fremme af patientbehandlingen.

Når den nye hovedstadsregion etableres, vil den få ledelse og administration af sygehusvæsenet, herunder forskningsledelse, som en af sine vigtigste opgaver. Af *Publikationslisten 2005* fremgår, at der i Frederiksborg Amt eksisterer mange dynamiske og spændende forskningsmiljøer, hvilket må være en styrke, når vi skal finde vor plads i regionen, ligesom det fortsat vil kunne støtte rekrutteringen og fastholdelsen af gode og værdifulde medarbejdere.

I 2004 var antallet af videnskabelige artikler øget med 34% i forholdet til året før. *Publikationslisten 2005* dokumenterer, at denne fremgang er blevet fastholdt samtidig med, at antallet af videnskabelige afhandlinger og bidrag til bøger er blevet fordoblet, hvilket yderligere understreger, at vi forskningsmæssigt står godt rustet op til regionsdannelsen

På forskningsudvalgets vegne

Per Jess
